

Country modding

Countries are the base playable element in Europa Universalis V. Countries require both a country definition and a setup.

Country definition

See also: Setup modding#Countries folder

Please help with verifying or updating older sections of this article.
At least some were last verified for version pre-release.

Countries are defined in the folder `in_game/setup/countries`.

```
YEM = { # Country Tag
    color = color_culture_yemeni # Map Color
    color2 = rgb { 16 41 202 }

    culture_definition = yemeni_culture # The country's culture
    religion_definition = sunni # The country's religion
}
```

Country Setup

Main article: Setup modding#Country setup

Whether a country exists at the start of the game or not, it also needs to have the country's "history" set up in the folder `main_menu/setup/start`

```
countries = {
    countries = { #This second entry is necessary
        SKE = {
            own_control_core = { # Core locations owned by the country at game start
                varberg halmstad kungsbacka
                ronneby bregne solvesborg
                gladsax osby
                helsingborg lund malmo
            }

            our_cores_conquered_by_others = { # Core locations not owned by the country at game start
                laholm asbo
            }

            capital = lund # The location of the capital city
        }
    }
}
```

```
country_rank = rank_kingdom # The country's rank. Defaults to country.  
  
government = { # Setup block for the country's government  
  ruler = swe_magnus_eriksson  
  ruler_term = { character = swe_magnus_eriksson start_date = 1332.6.19 regnal_number = 1 }  
}  
  
}
```
