Modifier blocks

modifier

Applied to all member countries:

```
modifier = {  
    block_from_change_to_kingdom_rank = yes  
    reject_subjugation_reasons = 25  
}
```

leader_modifier

Applied only to the leading country:

```
leader_modifier = {  
    diplomatic_capacity = 1  
    great_power_score_exempt_from_forfeit = 250  
}
```

international_organization_modifier

Applied to the organization itself:

```
international_organization_modifier = {  
    hre_max_elector = 4  
    hre_max_archbishop_elector = 3  
}
```

riables

```

imperial_authority = {
    format = "IMPERIAL_AUTHORITY_DISPLAY"
    change_format = "VARIABLE_CHANGE_FORMAT"
    min = 0
    max = 100
    monthly_change = {
        add = {
            desc = "INTERNAL_PEACE"
            if = {
                limit = { international_organization_has_internal_peace = no }
                value = 0
            }
            else = {
                value = 0.05
            }
        }
    }
}
}
}
}

```

Special statuses

Define special positions within the organization:

```

special_statuses_implemented = {
    emperor
    elector
    archbishop_elector
    free_city
}

```

Parliament

For an IO parliament to be functional, at least one issue should be applicable. Otherwise the parliament will try to call upon country-specific parliament issues, printing many errors in the log.

Base game organizations

- hre - Holy Roman Empire
- catholic_church - Catholic Church
- coalition - Anti-aggressor coalitions
- crusade - Religious crusades
- defensive_league - Defensive alliances
- independence_movement - Independence wars

Example

```

    leader_type = country
    leader_change_method = vote
    disband_if_no_leader = yes
}

```

```
leader_modifier = {
    diplomatic_reputation = 1
}

can_join_trigger = {
    is_neighbor_of_international_organization = scope:recipient
}

can_leave_trigger = {
    NOT = { is_leader_of_international_organization = scope:recipient }
}

on_joined = {
    add_prestige = 5
}

ai_desire_to_join = {
    add = {
        desc = "THREATENED"
        if = {
            limit = { any_neighbor_country = { is_threat_to = root } }
            value = 50
        }
    }
}
```
