

Law modding

Laws modding covers the creation and modification of laws in Europa Universalis V. Laws are policies that countries can adopt, providing various modifiers and affecting gameplay.

Please help with verifying or updating older sections of this article.
At least some were last verified for version 1.0.

Laws are stored in `/Europa Universalis V/game/in_game/common/laws/` as `.txt` files organized by government type and category.

Law structure

A law definition specifies categories, options, and modifiers:

```
law_group_name = {  
  law_category = administrative      # Law category for UI  
  law_gov_group = monarchy          # Government type restriction  
  
  potential = {  
    # Conditions for law group to appear  
  }
```

```
option_name = {
    unique = yes                # Only one country can have this

    potential = {
        # When this option appears
        tag = XXX
    }

    allow = {
        # Conditions to select this option
        current_age = age_5_absolutism
    }

    country_modifier = {
        # Modifiers applied when selected
        monthly_legitimacy = 0.05
        stability_investment = small_stability_investment
    }

    estate_preferences = {
        # Which estates prefer this option
        clergy_estate
        nobles_estate
    }

    years = 2                  # Cooldown before changing
}
```
